

“Blackland customers,

It has come to our attention that RCH Water Supply Corporation issued a website notice to all their customers regarding a possible interconnect with Blackland Water Supply Corporation (“BWSC”). BWSC is always open to partnering with other developers and Water Supply Corporations to support the needs of the community, however, BWSC’s number one priority is BWSC’s customers. As such, BWSC wanted to be transparent with its customers. At this time, there are no proposals or active negotiations that have occurred outside of theoretical discussions regarding a possible future interconnect at an undetermined time with RCH. Several action steps would need to be taken prior to entering into an agreement with RCH to provide the interconnect, including but not limited to Board approval for the action and agreement. Should you have questions or be interested in any upcoming business of BWSC, please attend the next Board meeting, as we are always happy to have customers interested and involved.

BWSC appreciates your continued support.
