I understand I am responsible for any damage to the meter. In the event this meter is not returned to Blackland Water Supply Corporation; I am responsible for the full replacement. This meter is valued at approximately \$2138.85. If you fail to return the meter, you will be charged for the full replacement cost at the current market price. During winter freezing weather you are responsible for winterizing the hydrant meter and RPZ by fully turning off the hydrant and draining the meter and RPZ. Insulation is highly recommended on helping protect the meter from freezing. \$50 will be added to the first months bill for meter installation.

**Monthly charges will be based on meter size and monthly usage.**
