Service Application and Agreement

AGREEMENT made this day _____ between
Blackland Water Supply Co., a corporation organized under the laws of the State
of Texas (hereinafter called the Corporation) and _____
(hereinafter called the Applicant and/or Member).

The Corporation shall sell and deliver water and/or wastewater service to the
Applicant and the Applicant shall purchase, receive, and/or reserve from the
Corporation in accordance with the bylaws and tariff of the Corporation as amended
from time to time by the Board of Directors of the Corporation.

Upon compliance with the said policies, including payment of the Membership
Fee, the Applicant qualifies for Membership as a new Applicant or continued
Membership as a transferee and thereby may hereinafter be called the Member.

Service Application and Agreement

The Member shall pay the Corporation for service hereunder as determined by the Corporation's tariff and upon the terms and conditions set forth therein, a copy of which has been provided as an information packet, for which the Member acknowledges receipt hereof by execution of this agreement. A copy of this agreement shall be executed before service may be provided to the Applicant.

The Board of Directors shall have the authority to discontinue service and cancel the Membership of any Member not complying with any policy or not paying any utility fees or charges as required by the Corporation's published rates, fees, and any conditions of service. At any time, services are discontinued, terminated or suspended, the Corporation shall not re-establish service unless it has a current signed copy of this agreement.

If this agreement is completed for the purpose of assigning utility service as a part of a rural domestic water and/or wastewater system loan project contemplated with the Rural Development, an Applicant shall pay an Indication of Interest Fee in lieu of a Membership Fee for the purposes of determining:

- 1) The number of taps to be considered in the design and
- 2) The number of potential ratepayers considered in determining the financial feasibility of constructing
- 3) A new water system or
- 4) Expanding the facilities of an existing water system.

The Applicant hereby agrees to obtain, utilize, and/or reserve service as soon as it is available. Applicants, upon qualifications for service under the terms of the Corporation's policies, shall further qualify as a Member and the Indication of Interest Fee shall then be converted by the Corporation to a Membership Fee. Applicant further agrees to pay, upon becoming a Member, the monthly charges for such service as prescribed in the Corporation's tariff.

Any breach of this agreement shall give cause for the Corporation to liquidate, as damages, the fees previously paid as an indication of interest. In addition to any Indication of Interest Fees forfeited, the Corporation may assess a lump sum of \$1,000.00 as liquidated damages to defray any losses incurred by the Corporation. If delivery of service to the said location is deemed infeasible by the Corporation as part of this project, the Applicant shall be denied Membership in the Corporation and the Indication of interest fee, less expense, shall be refunded. The applicant may reapply for service at a later date under the terms and conditions of the Corporation's policies. For the purposes of this agreement, an Indication of Interest Fee shall be of an amount equal to the Corporation's Membership fees.

All water shall be metered by meters to be furnished and installed by the Corporation. The meter and/or wastewater connection is for the sole use of the Member or customer and is to provide a service to only one (1) dwelling or one (1) business. Extension of pipe(s) to transfer service from one property to another, to share, resell, or submeter water to any other persons, dwellings, businesses, or property etc. is prohibited.

The Corporation shall have the right to locate a water service meter and the pipe necessary to connect the meter to the Member's property at a point to be chosen by the Corporation, and shall have access to its property and equipment located upon Member's premises at all reasonable and necessary times for any purpose connected with or in the furtherance of its business operations, and upon discontinuance of service.

The Corporation shall have the right to remove any of its equipment from the Member's property.

Service Application and Agreement

The Member shall install at their own expense any necessary service lines from the Corporation's facilities and equipment to the point of use, including any customer service isolation valves, backflow prevention devices, clean-outs, and other equipment as may be specified by the Corporation.

The Corporation shall also have access to the Member's property for the purpose of inspecting possible cross-connections and other undesirable plumbing practices.

The Corporation is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. This service agreement serves as a notice to each customer of the plumbing restrictions which are in place to provide this protection. The Corporation shall enforce these restrictions to ensure the public health and welfare.

The following undesirable plumbing practices are prohibited by state regulations:

I. No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an air gap or an appropriate backflow prevention assembly in accordance with state plumbing regulations. Additionally, all pressure relief valves, and thermal expansion devices must be in compliance with state plumbing codes.

II. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the proper installation of an air gap or a reduced pressure-zone backflow prevention assembly and a service agreement must exist for annual inspection and testing by a certified backflow prevention device tester.

III. No connection which allows condensing, cooling or industrial process water to be returned to the public drinking water supply is permitted.

IV. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of any public water supply.

V. No solder or flux which contains more than 0.2 % lead may be used for the installation or repair of any plumbing in a residential or nonresidential facility providing water for human consumption and connected to a public drinking water supply system.

VI. No plumbing fixture is installed, which is not in compliance with a state-approved plumbing code.

The Corporation shall maintain a copy of this agreement as long as the Member and/or premises are connected to the public water system.

The Member shall allow his property to be inspected for possible cross-connections and other undesirable plumbing practices. These inspections shall be conducted by the Corporation or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Corporation's normal business hours. Members are responsible for the fee associated with such inspection.

The Corporation shall notify the Member in writing of any cross-connections or other undesirable plumbing practices which have been identified during the initial or subsequent inspection. The Member shall immediately correct any undesirable plumbing practices on their premises.

The Member shall, at his expense, properly install, test, and maintain any backflow prevention device required by the Corporation. Copies of all testing and maintenance records shall be provided to the Corporation which is required.

Failure to comply with the terms of this service agreement shall cause the Corporation to either: terminate or properly install, test and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this agreement shall be billed to the Member.

In the event the total water supply is insufficient to meet all the Members, or in the event there is a shortage of water, the Corporation may initiate the Emergency Rationing Program specified in the Corporation's Tariff. By the execution of this agreement, the Applicant hereby shall comply with the terms of said program.

By execution hereof, the Applicant shall hold the Corporation harmless from any and all claims for damages caused by service interruptions due to waterline breaks by utility or like contractors, tampering by other Members/users of the Corporation, normal failures of the system, or other events beyond the Corporation's control.

The Member shall grant to the Corporation, now or in the future, any easements of right-of-way for the purpose of installing, maintaining, and operating such pipelines, meters, valves, any other equipment which may be deemed necessary by the Corporation to extend or improve service for existing or future Members, on such forms as required by the Corporation.

By execution hereof, the Applicant shall guarantee payment of all other rates, fees, and charges due on any account for which said Applicant owns a Membership Certificate. Said guarantee shall pledge any and all Membership Fees against any balance due to the Corporation. Liquidation of said Membership Fees shall give rise to discontinuance of service under the terms and conditions of the Corporation's tariff.

By execution hereof, the Applicant agrees that non-compliance with the terms of this agreement by said Applicant shall constitute denial or discontinuance of service until such time as the violation is corrected to the satisfaction of the Corporation. Any misrepresentation of the facts by the applicant on any of the four pages of this agreement shall result in discontinuance of service pursuant to the terms and conditions of the Corporation's tariff.

PLEASE READ CAREFULLY

The Texas Commission on Environmental Quality (TCEQ) requires all community water systems to maintain a cross-connection control program for protection of the system that distributes drinking water to your home or business.

As part of this TCEQ requirement, residents with septic system on their property must install a reduced pressure zone backflow preventer (RPZ) on their irrigation system and have it tested annually. As a courtesy, Blackland Water Supply Corp., grandfathered existing double check valve assemblies (DCVA) if they were in service at the beginning of the program and to be tested annually.

Note if a grandfathered double check valve assemblies needing replacement must be replaced with a RPZ as required by state regulations.

Before a lawn sprinkler system is installed, the double check valve will have to be inspected and tested by a **Backflow Prevention Specialist**. This form must be completed and signed before connecting to the water supply.

If any of these forms are not completed, service will be terminated until completion. If you have any questions, please contact Blackland Water Supply Co. at: 972-771-6375.

The following forms must be completed and returned to our office:

- 1) A Service Agreement signed by an owner.
- 2) A customer service inspection by Blackland Water Supply Co. official inspector or a licensed plumber.

If a lawn sprinkler system is to be installed, the double check valve will have to be inspected and tested by a **Backflow Prevention Specialist**. This form must be completed and signed before connecting to the water supply.

If any of these forms are not completed, service will be terminated until completion. If you have any questions, please contact Blackland Water Supply Co. at: 972-771-6375.

Acknowledgment of Plumbing Instructions (CSI)

Purpose

Blackland Water Supply Co. (BWSC) is responsible for protecting the water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this acknowledgment is to notify each customer of the plumbing restrictions which are in place to provide this protection. BWSC enforces these restrictions to ensure the public health and welfare. Each customer must sign this acknowledgment before BWSC will begin service. In addition, when service to an existing connection has been suspended or terminated, BWSC will not reestablish service unless it has a signed copy of this acknowledgment.

Plumbing Restrictions

The following undesirable plumbing practices are prohibited by State regulations.

- 1.) No direct connection between BWSC and a potential source of contamination is permitted. Potential sources of contamination shall be isolated from BWSC by an air-gap or an appropriate backflow prevention device.
- 2.) No cross-connection between BWSC and a private water system is permitted. These potential threats to BWSC shall be
- 3.) Eliminated at the service connection by the installation of an air-gap or a reduced pressure backflow prevention device.
- 4.) No connection which allows water to be returned to the public drinking water supply is permitted.
- 5.) No pipe or pipe fitting which contains more than .25% lead may be used for the installation or repair of plumbing at any connection which provides water for human use.
- 6.) No solder or flux which contains more than .2% lead can be used for the installation or repair of plumbing at connection which provides water for human use.

Responsibilities

The following are the terms of the responsibilities between BWSC and the under-signed customer.

- BWSC will maintain a copy of this acknowledgment as long as the customer and/or the premises are connected to BSWC.
- The customer shall allow his property to be inspected for possible cross-connections and other undesirable plumbing practices. The

inspections shall be conducted by BWSC or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during BWSC's normal business hours.

- BWSC shall notify the customer in writing of any cross connections or other undesirable plumbing practice which has been identified during the initial inspection or the periodic re-inspection.
- The customer shall immediately correct any undesirable plumbing practice on the premises.
- The customer shall, at their expense, properly install, test, and maintain any backflow prevention device required by BWSC. Copies of all testing and maintenance records shall be provided to BWSC.

Enforcement

If the customer fails to comply with the terms of the acknowledgment, BWSC shall, at its option, either terminate service or properly install, test, and maintain any appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this acknowledgment shall be billed to the customer.
