NOTICE OF TCEQ REPORTING VIOLATION

Failure to Submit a Disinfectant Level Quarterly Operating Report (DLQOR) Monitoring, Routine (DBP), Major/Chlorine

Dear Customer:

The Blackland WSC water system PWS ID 1990004 has violated the monitoring/reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This violation occurred in the monitoring period First Quarter 01/01/2017 – 03/31/2017.

This violation was a reporting violation. Please be aware that Blackland WSC purchases treated water. We are maintaining the proper disinfection residuals within our distribution system and we are monitoring the disinfectant residuals at various locations throughout the distribution system. **We failed to submit the report by the reporting due date.** We are taking the following actions to address this issue:

We will use the Online Electronic Reporting System to submit quarterly disinfection reports to the TCEQ to make sure the report is delivered on time. If the Electronic Reporting System is not available, Blackland Water Supply will use Certified Mail with Delivery receipt to ensure timely delivery to TCEQ.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e. people in apartments, nursing homes, schools and businesses.) You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact:

Melissa Rich, General Manager
